CASE No.: RCU2018-00014	CASE NAME: Viaero at Hoffmans Creek
--------------------------------	--

Owner's Name:	JT3 Trust
Applicant's Name:	Rick Bailey, Viaero
Applicant's Address:	32 Cooper Court, Fort Morgan, CO 80701
Location of Request:	93800 East 96 th Avenue
Nature of Request:	A renewal of a conditional use permit to allow a commercial telecommunication tower on the property
Zone Districts:	Agriculture-3 (A-3)
Comprehensive Plan:	Agriculture
Site Size:	6 acre portion of a 640 acre parcel
Proposed Uses:	Commercial Telecommunications Tower
Existing Use:	Commercial Telecommunications Tower
Hearing Date(s):	PC: October 11, 2018 / 6:00 p.m. BOCC: October 30, 2018 / 9:30 a.m.
Report Date:	October 12, 2018
Case Manager:	Greg Barnes
PC Recommendation:	APPROVAL with 8 Findings-of-Fact and 4 Conditions
Staff Recommendation:	APPROVAL with 8 Findings-of-Fact and 4 Conditions

SUMMARY OF PREVIOUS APPLICATIONS

On December 1, 2008, the Board of County Commissioners (BoCC) approved a conditional use permit to allow a 330-foot commercial telecommunications tower on the property for ten years.

SUMMARY OF APPLICATION

Background

Viaero, the applicant, is requesting a renewal of the conditional use permit (CUP) to allow the commercial telecommunication tower to remain on the subject property for another ten years.

The existing telecommunication tower occupies six acres of a 640 acre parcel (see Exhibit 3.2). Elevation plans submitted with the application show the tower is currently 330 feet tall and will remain the same (see Exhibit 3.2). The site includes a six foot tall chain-link fence surrounding the equipment area of the tower. The tower is anchored to the ground by several guy-wires. There are no proposed changes to the existing site.

Site Characteristics:

The subject property is located approximately six miles southeast from the intersection of Hanks Crossing Road and East 96th Avenue. The site has access on East 96th Avenue, through a private roadway known as Prospect Way Road. The tower is approximately two miles south of the intersection of East 96th Avenue and Prospect Way Road. There are several existing agricultural structures, including a barn, grain silos, and a vacant single-family residential dwelling on the 640-acre parcel.

Development Standards and Regulations Requirements:

Per Section 3-07-01 of the Adams County Development Standards and Regulations, a conditional use permit is required for a commercial telecommunication tower in the A-3 zone district. Section 4-09-02-07 of the County's Development Standards and Regulations outlines design and performance standards for telecommunication facilities. These standards include maximum height, landscaping, screening, setbacks from property lines, separation from other telecommunication tower facilities, and setbacks from residential uses.

The elevation plans, provided with the application, show the tower is 330 feet in height. Per Section 3-10-07-05-01 of the County's Development Standards, the maximum height allowed in the A-3 zone district for dwellings and accessory structures is thirty-five (35) feet. Per Section 4-09-02-07(3a) of the Development Standards, the BoCC, through the conditional use permit approval, may grant exceptions to allow the height of the freestanding telecommunication tower to exceed the allowed height in the zone district.

Setback requirements for proposed telecommunication towers are outlined in Section 4-09-02-07(3) of the County's Development Standards and Regulations. Per these standards, freestanding telecommunication towers shall not be located closer than the height of the tower from any property line, unless a waiver is obtained from the BoCC. The existing telecommunication tower is located over 330 feet away from the all property lines.

Landscaping and fencing may be required to screen the telecommunication tower and associated equipment from adjoining properties or public roadways. The requirements for landscaping and screening are outlined in Section 4-09-02-07(3b) of the County's Development Standards and Regulations. Per this section of the Development Standards, siting of telecommunication towers should preserve or enhance existing character of vegetation in surrounding areas of the tower, and, if any, existing vegetation should be preserved or improved to provide screening for the facility. Due to remote location of the tower, the applicant is not proposing any landscaping. In addition, the closest developed property to the site is over one mile from the tower. There is also a six foot chain-link fence surrounding equipment area at the base of the tower.

Section 4-09-02-07(3d) of the County's Development Standards and Regulations requires new telecommunication towers to be located no closer than one-thousand (1,000) feet from the nearest telecommunication tower. From the information submitted with the application, no telecommunication towers are located within 1,000 feet. The applicant also provided coverage maps of the area to demonstrate the need for the existing tower to remain.

As a requirement of the County's Development Standards, a bond is required to ensure removal of the facility if it is abandoned or no longer needed. The applicant submitted a bond in the amount of \$22,750 to ensure removal of the tower, if the applicant fails to remove it after expiration of the conditional use permit.

Future Land Use Designation/Goals of the Comp-Plan for the Area

The future land use designation on the property is Agriculture. Per Chapter 5 of the Adams County Comprehensive Plan, the Agriculture designation is intended for land holdings of at least 35 acres, and for preservation of agricultural areas for long-term farming. The future land use areas designated for agriculture are also to conserve environmentally-sensitive areas.

The request to develop the property for a telecommunication tower is consistent with the County's Comprehensive Plan, as it will aid in providing improved telecommunication coverage to current and future residents of the area, as well as continue to support telecommunication needs of agricultural uses in the area.

Surrounding Zoning Designations and Existing Use Activity:

Northwest A-3 Agricultural	North A-3 Agricultural	Northeast A-3 Agricultural
West A-3 Agricultural	Subject Property A-3 Agricultural	East A-3 Agricultural
Southwest A-3 Agricultural	South A-3 Agricultural	Southeast A-3 Agricultural

Compatibility with the Surrounding Land Uses:

All of the surrounding properties to the site are designated with Agricultural-3 zoning, and are mostly vacant or used for farming. There is a vacant single-family dwelling and agricultural activities within a half-mile of the site. No other structures are located within the vicinity of the site. The request is compatible with the surrounding properties, and will not be detrimental to the surrounding area.

PLANNING COMMISSION UPDATE

The Planning Commission (PC) considered this case on October 11, 2018, and voted (6-0) to recommend approval of the request. The applicant spoke at the meeting and had no concerns with the staff report or presentation. He expressed the importance of allowing location of such

telecommunication services throughout Adams County. There was no one from the public to speak in favor or in opposition to the request.

Staff Recommendation:

Based upon the application, the criteria for approval of a conditional use permit, the County's Comprehensive Plan, and a recent site visit, staff recommends approval of the request with 8 findings-of-fact and 4 conditions.

Findings-of-fact for Approval:

1. The conditional use is permitted in the applicable zone district.
2. The conditional use is consistent with the purposes of these standards and regulations.
3. The conditional use will comply with the requirements of these standards and regulations, including but not limited to, all applicable performance standards.
4. The conditional use is compatible with the surrounding area, harmonious with the character of the neighborhood, not detrimental to the immediate area, not detrimental to the future development of the area, and not detrimental to the health, safety, or welfare of the inhabitants of the area and the County.
5. The conditional use permit has addressed all off-site impacts.
6. The site is suitable for the proposed conditional use including adequate usable space, adequate access, and absence of environmental constraints.
7. The site plan for the proposed conditional use will provide the most convenient and functional use of the lot including the parking scheme, traffic circulation, open space, fencing, screening, landscaping, signage, and lighting.
8. Sewer, water, storm water drainage, fire protection, police protection, and roads are available and adequate to serve the needs of the conditional use as designed and proposed.

Recommended Conditions:

1. Any telecommunication facility that ceases to be in operation for a consecutive period of six months or more shall be removed from the site within 90 days of the end of such period of non-use.
2. The conditional use permit shall expire on October 30, 2028.
3. The height of the freestanding telecommunication tower shall not exceed 330 feet.
4. The tower shall provide co-location opportunities for other telecommunication tower providers.

PUBLIC COMMENTS

Property Owners Notified	Number of Responses
5	1

Staff sent five notices to property owners and occupants within 1,000 feet of the subject parcel. As of writing this report, staff has received one public comment in support of the request.

COUNTY AGENCY COMMENTS

Staff reviewed the request and has no outstanding unresolved comments on the application.

**RE: Application for Renewal of Conditional Use Permit, Viaero Wireless
Telecommunication Tower**

Conditional Use Permit-Hoffman's Creek Site

NE Colorado Cellular Inc., d/b/a Viaero Wireless and Mountain Tower & Land LLC., are seeking reauthorization of a Conditional Use Permit for an existing wireless telecommunication/broadband facility which consists of a 330' tall guyed tower, and supporting ground equipment (see Exhibit A, a photo of the existing tower site). The tower and supporting equipment will be in full operation 24 hours per day, 7 days a week. The tower and supporting equipment is secured with an approximate 60'x 70' chain link fence with three strands barbed wire on top. The tower is a critical link in Viaero's network as we continue to provide wireless cellular/broadband within Eastern areas of Adams County.

NE Colorado Cellular Inc., d/b/a Viaero Wireless is a Colorado corporation, designated as a privately owned "Public Utility" in the State of Colorado. Viaero strives to offer high-quality wireless network services, including wireless telephone services and wireless high speed internet. Viaero's local network currently extends throughout Colorado, Nebraska, Western Kansas and Eastern Wyoming. Viaero strives to provide seamless coverage in its service areas, as well as coverage throughout North America and beyond through dozens of national and international roaming agreements with other service providers. Like Viaero's other towers, the touchstones of this tower's design are safety and durability. The tower was designed per TIA/EIA-222-F "Structural Standards for Steel Antenna Towers and Antenna Supporting Structures" and built to a very high standard including specifications for a 100 year life span with a high loading capacity to meet future and anticipated demands. The unmanned site does not require water or sanitation. The tower complies with all Federal Communications Commission guidelines and standards and is registered with the FCC Antenna Structure Registration as structure 1267049 (Exhibit B). The facility also meets all Federal, State, and County standards and contains a small four foot unlit sign, which is attached to the fence to identify the owner.

Continued Need in Area

In 2008, the original need for this site was to offer new, state of the art wireless services to the residences of Adams County that did not have reliable wireless services. In 2010, the telecommunications industry was on the edge of 2G wireless technology and in the process of converting to 3G technologies. The wireless industry has seen some dramatic changes in a few short years, and today the increased data usage in the 4G environment has placed extremely high demands on existing capacity for service. The data usage has increased almost 10 fold as customers are using their smart phones, tablets and other wireless devices at a higher level. Compared to 2008, when a cell phone was a convenient device to make a call or text, today customers are reliant on smart phones and other wireless devices that have almost completely replaced the "landline". Additionally, customers are reliant on those wireless devices working seamlessly in all locations and providing better in-building coverage with higher data speeds. From a wireless broadband/communication facility standpoint, this location remains an ideal location for delivering high quality wireless services to this area of Adams County.

Viaero strives to develop a robust, redundant network by linking its towers together by microwave radio paths. This provides Viaero's customers a reliable network that is rarely impacted by outages experienced by other telephone companies, because the network is not reliant on third-party carrier facilities. The microwave radio paths need to be able to connect the site to an existing tower in our network. The nearest tower that would provide a reliable microwave path is an existing Viaero site addressed as 16671 MCR A, Fort Morgan, Colorado and is named by Viaero as Fort Morgan South, CO facility.

Co-Location & Capacity

Viaero Wireless and its affiliated companies manage properties that contain the company owned communication towers and supporting equipment. They are used for the benefit of Viaero's wireless network, as well as providing space and other services to other wireless providers for a variety of uses. In the case of this site, Viaero believes that as wireless technologies evolve (like 5G) other service providers will be glad that the facility will be available to enhance their networks as demand requires. Space on this tower may also be available for first responders and the FirstNet network.

Location

In 2009, Viaero entered in to an agreement with the property owner for a Permanent Easement to operate the facility (Exhibit C). In 2017, Viaero assigned the Permanent Easement to Mountain Tower & Land LLC, one of Viaero's affiliate companies (Exhibit D). Viaero Wireless continues to own the tower and operate the site through a Master Lease Agreement (Exhibit E). The approximate 5.11 acre easement, along with its' access and utility easements, are located in part of the SW ¼ of Section 28, Township 2 South, Range 58 West of the 6th P.M. Adams County, Colorado. In this case, and as a condition of approval by the Adams County

Development Department, Viaero obtained a permanent right of way easement from the property owners from a point beginning at Adams County Road "96 Ave." from a point intersecting Adams County Road "Prospect Way" to a point located in the NW ¼ of Section 28, Township 2 South, Range 58 West, Adams County, Colorado (Exhibits F & G). These permanent right of way easements have also been assigned to Mountain Tower & Land LLC., an affiliated company (Exhibits H & I). The site is currently zoned A-3 and is identified by the Adams County Assessors as ID# 01700000049.

2008 Application and approving documents & required new documents

This application was reviewed as (CUP Case PRJ2008-00019), building permit (# BDL09-00001) approval (Exhibit J).

A recent review of the site and review of the 2008 application reflect that not much has changed. There has been no new development of placement of new towers in the area. A set photos from this year reflecting the area is attached (Exhibit K).

Viaero Wireless would respectfully ask that the CUP permit be issued. Viaero would ask that this permit be for a minimum of ten years, but would respectfully ask that consideration be given to allow for a twenty year permit based on the following: A) most leases on telecommunication facilities are for a period of this length in time and B) this tower has been constructed and designed to withstand the requested duration of time. The approval of this request would be in the best interest of Adams County, and would continue to provide valuable infrastructure for the benefit of the residents of Adams County and others traveling in the area.

Should you require any additional information or have any questions concerning this request for approvals, please do not hesitate to contact me. Thank you.

Signed,

Rick Bailey

**RE: Renewal of a Communications Tower at 93800 E. 96th Ave, Adams County, Colorado.
RCU2018-00014**

Dear Mr. Barnes:

Thank you for the opportunity to comment on potential impacts of the reauthorization of a conditional use permit for an existing communications tower on threatened and endangered wildlife species located at 93800 E. 96th Ave, Adams County, Colorado. The mission of Colorado Parks and Wildlife (CPW) is to perpetuate the wildlife resources of the state, to provide a quality state parks system, and to provide enjoyable and sustainable outdoor recreation opportunities that educate and inspire current and future generations to serve as active stewards of Colorado's natural resources. Our goal in responding to land use proposals such as this is to provide complete, consistent, and timely information to all entities who request comment on matters within our statutory authority.

CPW would expect a variety of wildlife species to utilize this site on a regular basis, most notably, small to mid-sized mammals, song birds, and raptors. The potential also exists for large mammals such as deer and pronghorn to frequent this site. Raptors and other migratory birds are protected from take, harassment, and nest disruption at both the state and federal levels. If a nest is built or discovered on or near the site, CPW recommends that buffer zones around nest sites be implemented during any period of activity that may interfere with nesting season. This will prevent the intentional or unintentional destruction of an active nest.

For further information on this topic, a copy of the document "Recommended Buffer Zones and Seasonal Restrictions for Colorado Raptors," is available from your local District Wildlife Manager. Following the recommendations outlined in this document will decrease the likelihood of unintentional take through disturbance.

CPW understands there is currently an existing wireless telecommunications facility which consists of a 330-foot tall guyed tower, and supporting ground equipment. The amount of habitat disrupted by the existing wireless telecommunications facility should not be significant to wildlife in Adams County. However, communication towers themselves may have negative impacts on flying birds. It is estimated that 4-5 million flying birds are killed

each year in the United States when they collide with communication towers. We appreciate any efforts that are made to mitigate any possible impacts to passing birds. The U.S. Fish and Wildlife Service developed guidelines on communication towers in order to address some of the impacts. A few of these guidelines, which may apply in this case, are listed below:

1. Guy wires should have daytime visual markers on the wires to avoid collisions.
2. Any on-ground security lighting should be down-shielded to keep light within the boundaries of the site.
3. Towers no longer in use should be removed within 12 month of cessation of use.

Thank you again for the opportunity to comment on the reauthorization for an existing communication tower at 93800 E. 96th Ave, in Adams County. Please do not hesitate to contact us again about ways to continue managing the facility in order to maximize wildlife value while minimizing potential conflict. If you have any further questions, please contact District Wildlife Manager Serena Rocksund at (303) 291-7132 or serena.rocksund@state.co.us.

Sincerely,

A handwritten signature in cursive script that reads "Crystal Chick".

TCHD Case No. 4959

Dear Mr. Barnes,

Thank you for the opportunity to review and comment on the renewal of a conditional use permit to allow continued use of the property by a commercial telecommunications tower in the Agricultural-3 zone district located at 93800 E. 96th Avenue. Tri-County Health Department (TCHD) staff has reviewed the application for compliance with applicable environmental and public health regulations and principles of healthy community design. After reviewing the application, TCHD has no comments.

Please feel free to contact me at 720-200-1585 or ahenrich@tchd.org if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Annemarie Heinrich", is written over a light blue horizontal line.

Subject: Viaero at Hoffmans Creek

Case Number: RCU2018-00014

To whom it may concern,

We support the continued existence of the commercial telecommunications tower located in the eastern part of Adams county. The tower supports the communication needs of the rural community.

Thanks for your consideration.

Kent Kalcevic

Request for Comments

Case Name: Viaero at Hoffmans Creek
Case Number: RCU2018-00014

May 29, 2018

The Adams County Planning Commission is requesting comments on the following application: **Renewal of a conditional use permit to allow continued use of the property by a commercial telecommunications tower in the Agricultural-3 (A-3) zone district.**

This request is located at 93800 E. 96th Ave. The Assessor's Parcel Number is 0173900000049.

Applicant Information: Rick Bailey
32 Cooper Ct.
Ft. Morgan, CO 80701

Please forward any written comments on this application to the Community and Economic Development Department at 4430 South Adams County Parkway, Suite# W2000A, Brighton, CO 80601-8216. You may also call us at (720) 523-6853. All comments must be received by 06/19/2018 in order that your comments may be taken into consideration in the review of this case. If you would like your comments included verbatim, please send your response by way of e-mail to GJBarnes@adcogov.org.

Once comments have been received and the staff report written, the staff report may be forwarded to you, by request, for your information. You will receive further notification when the public hearing dates for this case are scheduled. The full text of the proposed request and additional colored maps can be obtained by contacting this office or by accessing the Adams County web site at www.adcogov.org/planning/currentcases.

Thank you for your review of this case.

Public Hearing Notification

Case Name: Viaero at Hoffmans Creek
Case Number: RCU2018-00014

Planning Commission Hearing Date: 10/11/2018 at 6:00 p.m.
Board of County Commissioners Hearing Date: 10/30/2018 at 9:30 a.m.

September 17, 2018

A public hearing has been set by the Adams County Planning Commission and the Board of County Commissioners to consider the following request: **Renewal of a conditional use permit to allow continued use of the property by a commercial telecommunications tower in the Agricultural-3 (A-3) zone district.**

The proposed use will be commercial telecommunication tower. This request is located at 93800 East 96th Avenue. The Assessor's Parcel Number is 0173900000049.

Applicant Information: Rick Bailey
32 Cooper Ct
Ft Morgan, CO 80701

The hearing will be held in the Adams County Hearing Room located at 4430 South Adams County Parkway, Brighton CO 80601-8216. This will be a public hearing and any interested parties may attend and be heard. The Applicant and Representative's presence at these hearings is requested. If you require any special accommodations (e.g., wheelchair accessibility, an interpreter for the hearing impaired, etc.) please contact the Adams County Community and Economic Development Department at (720) 523-6800 (or if this is a long distance call, please use the County's toll free telephone number at 1-800-824-7842) prior to the meeting date.

For further information regarding this case, please contact the Community and Economic Development Department, 4430 S Adams County Parkway, Brighton, CO 80601, 720-523-6800. This is also the location where maps and/or text certified by the Planning Commission may be viewed.

The full text of the proposed request and additional colored maps can be obtained by contacting this office or by accessing the Adams County web site at www.adcogov.org/planning/currentcases.
